Proper immune function is crucial in children

Suppys Immunity is a delicious, all-natural immune support formula for children, containing patented Wellmune® natural yeast beta-glucan derived from the cell wall of a highly purified, proprietary strain of baker's yeast (Saccharomyces cerevisiae).*

A large body of clinical research suggests that Wellmune® can help support children's natural immune responses and provide protection from health challenges arising from physical and lifestyle stress.*[1]

Proper immune function is crucial in children, especially as they grow and mature. Children also tend to be at greater risk of foreign challenges due to activities like school, playing outside, and being in daycare. Suppys Immunity is a great way to help kids get the beta-glucan they need for healthy immune function in tasty chewable tablets.

How Suppys Immunity Works

Despite being fungi, certain species of yeast have beneficial components for human health. In particular is baker's yeast (Saccharomyces cerevisiae), which has a unique polysaccharide called beta-glucan in its cell wall.

After ingestion, Wellmune® beta-glucan is taken up by immune cells in the gastrointestinal tract and transported to immune organs and is slowly released for days thereafter. In vivo and human clinical trials have shown that Wellmune® supports both innate and adaptive immune responses in children by promoting the production/activity of cytokines, white blood cells, T cells and other immune factors.*[2,3]

66% fewer upper respiratory tract infections*
6 fewer sick days per 12 weeks*

According to clinical research, children supplementing with Wellmune® reported **66% fewer upper respiratory tract infections (URTI) symptoms** and **six fewer sick days over the course of 12 weeks** than children taking a placebo.[4] Better yet, another study showed children drinking a milk formula with Wellmune® **experienced fewer episodes of allergy symptoms** than children drinking unfortified milk.[5]

Suppys Immunity Supplementation

Research cited herein suggests that Wellmune® supports children's natural immune response and may protect them from invasive health challenges.* To summarize, the most pertinent research-backed benefits of supplementation with Suppys Immunity may include:

- Support children's natural immune function*
- All-natural ingredients
- Comes in tasty chewable tablets
